

The SleepImage System

SleepImage is an FDA-cleared, low cost, medically-actionable system that identifies sleep dysfunction and measures sleep quality. SleepImage has easy-to-understand biometrics with automated analysis so Clinicians can review and analyze uploaded ECG data to screen for Sleep Disorders on a secure HIPAA compliant website.

Patient-Based Membership

Patient-Based Membership is suitable for organizations performing selective screening of their patient populations and/or multiple sleep tests per patient as part of therapy management. Memberships are available in 1, 7, 30, 60, and 90 day increments, purchased for each individual patient. Membership includes unlimited upload and review of studies during the purchased membership term. Sleep Data Recorders and electrodes are purchased separately.

Two Account Roles

Admin Role

The Admin role is designed for a Practice Manager or Head Administrator in an organization. Admins perform operational functions such as managing Clinician access, adding Patients, uploading sleep studies as well as purchasing supplies and memberships for the account.

Clinician Role

The Clinician role is designed for Clinicians to review, monitor and analyze their Patients' uploaded sleep studies. Clinicians can add Patients, upload sleep studies and also have the ability to add detailed observations to each sleep study.

Pricing

Patient-Based Membership:	\$14.99	1 day Membership
	\$19.99	7 day Membership
	\$29.99	30 day Membership
	\$34.99	60 day Membership
	\$44.99	90 day Membership
Electrodes	\$29.85	30 Tests <also available in larger quantities>
Sleep Data Recorder Kit:	\$275.00	Per Kit <includes cables for testing & uploading>

Sleep Data Recorders use two CR2016 coin cell batteries (two are included in each Kit) that should be replaced per approximately every five studies. These batteries are easily sourced locally at pharmacies and retail stores, or through online retailers.
