

Wellness Accounts

SleepImage Wellness Accounts are designed for health conscious individuals who want to manage their sleep quality with or without the supervision of a Clinician. The Wellness Accounts offer two Membership options for individuals as well as Clinician Accounts for Clinicians who want to have a dashboard into their patients' sleep studies.

Wellness Membership

Wellness Membership is offered for individual Users who want to manage their sleep quality without the supervision of a Clinician. They receive objective and accurate measure of sleep quality and trending data. Sleep Data Recorders can be purchased for individual use, or shared amongst multiple Users. Each Membership is only for one User to enable Reporting and Trending capabilities.

Prescription Membership

Prescription Membership is offered for individual Users working with a healthcare professional. Users connect with their Clinician using SleepImage's embedded Invitation process. Sleep Data Recorders can be purchased for individual use, shared amongst multiple Users, or loaned from a Clinician. Each Membership is only for one User to enable Reporting, Trending and personalized Clinician connections.

Clinician Accounts

Clinician Wellness Accounts are offered free of charge for Clinicians to connect with their Patients to screen for sleep disorders, track therapy efficacy and more. They connect with Patients using SleepImage's embedded Invitation process. Clinicians can purchase Sleep Data Recorders for their Patients to share, or instruct their Patients to purchase their own. Clinicians connected with Patients who have purchased a Prescription Membership will see all Sleep Studies free of charge. Clinicians can alternatively purchase Clinician Reports to see their Patients' sleep studies on an individual basis for Patients who either have no Membership or the Wellness Membership.

Pricing

Sleep Data Recorder Kit	\$249
Wellness Membership	\$7.99/month**
Prescription Membership	\$11.99/month**
Clinician Reports	\$18.99/report
Electrodes	\$29.85/30 tests

Sleep Data Recorders use two CR2016 coin cell batteries (two are included in each Kit) that should be replaced per approximately every six studies. These batteries are easily sourced locally at pharmacies and retail stores, or through online retailers.

***Each Wellness and Prescription Membership is only for one individual User, based on a minimum of 12-month commitment, paid monthly with recurring credit card payments*
